

```
constructor_impl< Context  
List, OutermostContextBase  
>::type
```

A UML class diagram showing inheritance. The base class, `constructor_impl`, is represented by a white box with a black border and is divided into three horizontal sections. The top section contains the text `constructor_impl< Context List, OutermostContextBase >::type`. The bottom two sections are empty. The derived class, `boost::statechart::detail::constructor`, is represented by a gray box with a black border and is also divided into three horizontal sections. The top section contains the text `boost::statechart::detail::constructor < ContextList, OutermostContext Base >`. The bottom two sections are empty. A blue arrow with a hollow triangular head points from the top section of the derived class box to the bottom section of the base class box, indicating an inheritance relationship.

```
boost::statechart::  
detail::constructor  
< ContextList, OutermostContext  
Base >
```
